DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: there are no prior arts teaching or suggesting of a power line carrier system comprising:

a power branch device including:

a power plug being removably connected to an in-house external power line,

a plurality of power outlets, and

a built-in power line for connecting the power plug and the power outlets; and

at least one electric device configured to be plugged into one of the power outlets, and

perform a power line communication in a first signal mode and a second signal

mode, with another electric device, the first signal mode being for a power line

communication between electric devices connected to the built-in power line, and

the second signal mode being for a power line communication between an

electric device connected to the built-in power line and an electric device not

connected to the built-in power line via the in-house external power line,

wherein the power branch device controls the power line communication to pass a power line carrier signal in the first signal mode only in the built-in power line, and allow a power line carrier signal in the second signal mode to pass in the in-house external power line.
